When it comes to your OEM orders or project installation needs, we're the provider you're looking for. Every year we reinvest 20 percent of our profits back into R&D, where we employ 20 engineers who've honed their skills by working for five years in South Korea's security industry. With our support and their expertise, they're able to release two new products each month.

We have over 200 products to choose from, each with a two-year warranty. And we round out these advantages with excellent 24/7 aftersales service. We have returned material authorization that enables us to attend to requests quickly. Work with a project partner to the Chinese government. Inquire today and expect a reply within 12 hours.
